ENCL. 3

1962 PLAIDIT

The following is an excerpt from a letter of 27 December 1962 from Charles H. Reichardt, Director of Intelligence, Atomic Energy Commission, to AD/CR:

"I have reviewed with great interest your recent report, Geographic Factors Affecting Clandestine Underground Nuclear Tests in the USSR, May 1962 (CIA/UR CR L-62-1). I feel that it makes a significant contribution to the field of arms control and disarmament by increasing our knowledge of potential clandestine test areas available to the USSR during a possible nuclear test ban."
